

Berardi Imballaggi

Specialist in packaging fruit
and vegetables for over 80 years

ECOPALBER

It respects the environment and protects the fruit

Berardi Imballaggi

Berardi Imballaggi is an industrial company specialized in the production of wooden, plastic and cardboard boxes for fruit and vegetable, and of wooden, fibre and MDF panels and semi-manufactured products. From the beginning the company has been strictly oriented to the customer needs and for this reason it offers a wide range of services designed to facilitate the delivery and assembly of goods (the customer can choose to put the assembly into the hands of a trusted sawmill).

Tradition and innovation are the core values of the company, that in line with market trends, always manages to provide modern solutions to the professionals of the fruit and vegetable sector. Traditional or completely innovative - **patented** - boxes, available also personalized with the customer brand. All our products are of high quality and highly distributed and well appreciated in local and national areas.

13,000 sq. mt. of covered area, of which 4000 sq. mt. dedicated exclusively to the manufacture of wooden boxes. Berardi Imballaggi has a production site of 38,000 sq. mt. Located in Ruvo di Puglia, Via Don Primo Mazzolari 7, in which carries out the entire production cycle, from plastic materials manufacturing to the production of melamine-faced panels and wooden, fibre or MDF semi-manufactured, from logistic activities to the administrative ones.

ECOPALBER

It respects the environment and protects the fruit

“Berardi Imballaggi” is pleased to present **ECOPALBER (modular reusable bins)**. The details of this innovation, which are the result of extensive research, have been **tested and appreciated by the Ministry of Economic Development**, which approved the extension of the patent in all the states of the European Community.

- It is made out of reclaimed wood. The absence of formaldehyde (harmful chemicals) makes it **ecologically valid for the transport of fruit and vegetables of all kinds**.
- It is **environmentally friendly because made of reclaimed wood**. Besides, it is cost effective because **it is reusable and it can be given against a deposit**.
- It is **suitable for carrying products** such as citrus fruit, potatoes and other commodities **which require adequate ventilation** in order to avoid the formation of harmful and smelly condensation.
- It is **available in several standard sizes** and it can be designed for specific needs and solutions.
- It can be **customized** with the company logo and **can be provided with a suitable cover**.

Why choose **ECOPALBER?**

80 unassembled Ecopalber

It solves the long-standing problem of bulky packaging. In comparison with bins of equal size, **it reduces the volume and the related cost of transport by 75%.**

Reclaimed wooden panels make it **very lightweight** and **facilitate the operations of assembly and disassembly**, making the transport easier.

Durable and stackable. It favors the storage operations ensuring the **integrity of the contained product.**

OUR PRODUCTS

Wood packaging

Wooden and MDF packaging of any standard and customizable size.

Polypropylene boxes

Polypropylene packaging available in different sizes and models. The high maneuverability and the smooth finish ensure the long life and integrity of the product.

Cardboard boxes

Wide range of cardboard boxes both wavy and smooth, that ensure the integrity of the goods during the transport and facilitate the retail store display. Possibility to customization.

Semi-manufactured in MDF
